Hi

I received a bulb from Nancy Wilson in 2006. It has multiplied well. From the single bulb, it has increased to 6 bulbs but only one of the bulbs were of flower size for this year. I have the pot of New Charm outdoors where it gets lots of sunlight. I checked the upright foliage and appears to be glaucous. This year it bloomed early December. Same as Mary Lou, I don't know what the seedling number is.
