Friends:

Bob Spotts' introduction Cactus Blossom has been blooming for over a week. It has heavy substance and perfect form. A simply delightful bloom. It isn't in Daffseek yet, so you can enjoy it as I have been. Melissa

Days in the mid 60s, nights mid 40s, east of SF bay in Livermore CA. I refrigerated the bulbs I got new from Oregon this year, and only those bulbs that were refrigerated (for maybe 4-5 weeks) are in bloom. Among show bulbs down from previous years, only tazettas are out.
