Loyce,

You wrote: As for me, I no longer enter 'Kokopelli' in collections---just single stems.

That's discouraging to learn. For me the greatest show value of 'Kokopelli' is in large collections - the Havens, Quinn, Bozievich, Tuggle, or Throckmorton.

For those readers not familiar with ADS Shows, the collections are:

Havens Award 12 different from three or more of Div. 5-10 Quinn Award 24 different from five or more Divisions
Bozievich Award 12 different from four or more Divisions Tuggle Award 12 different sets of three stems of the
same cultivar/species from three or more Divisions Throckmorton Award 15 with different RHS classifications All the
collections require Standard cultivars or species. In the ADS this includes Intermediates.
