Two more of kids from Kazan x Golden Orbit .

Early Star a garden name that will not be registered. 4Y O

Is easily the tallest of the selections, opens with the best orange colour but is a mud-lark.

They can be to tall and heavy.

Next is Lunar Probe. Difficult colour, -- that line between yellow and orange, maturing to soft orange.

Best form and fullest head of the four. Seed and pollen fertile , will flower first kids next year.

Very round, strong, mid length stem.
