

First flower (or is it last flower) of the season

Author : Brian Duncan, Northern Ireland

Categories : [Hybridizing](#), [Seedling](#)

Date : September 12, 2009

Apologies for the out of focus picture - taken at dusk and my hand was not steady enough for the long exposure.

The seedling label says N. 'Fyno' x N. papyraceus but I suspect there is no paternal influence -so it is just 'Fyno' OP. It was one of my crazy wild chance crosses, hoping for a miracle!!! I wonder if anyone has succeeded with such a cross? Must check Daffseek.
