Waldorf Astoria .

From John Hollevers patch ; I had not seen this flower before ...

On a very strong stem that held the blooms up well in some rather strong recent storms .

A little greening on the backs when young but most grew out of it ...

The top bloom was about 4 days older than the lower two . Colour is much richer orangy - pink at maturity .Top flower would have done well in any show ,perhaps size may be down a little .

Will have to stay in the pub to give a fair assessment ...

John
