

Narcissus flavus

Author : James Akers, England

Categories : [Species](#)

Date : October 10, 2011

[Nomenclatura_1_entrega.pdf](#)

I assume that this is a reaction by Kew to the new draft Flora Iberica which states

Queltia jonquilla (L.) Herb., Amaryllidaceae: 315 (1837) Stephanophorum luteum Dulac, Fl. Hautes-Pyrénées: 134 (1867), nom. illeg. {} = Narcissus flavus Lag., Elench. Pl.: [13] (1816) Ind. Loc.- ["Colitur in Hortis"] {} = Narcissus jonquilla var. henriquesii Samp. in Bol. Soc. Brot. ser. 2, 7: 127 (1931) Ind. Loc.- ["Alentejo... entre as pedras do rio Xarrama, junto à vila do Torrão"] {} Narcissus jonquilla f. henriquesii (Samp.) Cout., Fl. Portugal ed. 2: 169 (1939)

Under the "Age rule" if the above is accepted then *Narcissus flavus* is the correct name. *N. fernandesii* will have been included because it has recently been considered to be *N. henriquesii*

For those who do not already have a draft copy of the relevant part of Flora Iberica, I attach it, and the pages in question are 18-19.
