Date : June 30, 2012

This is one of my favourite early season pinks. Registered as G Pink -- from the master of early pinks Graham Phillips. Opens with just a pink rim, quickly matures to an even soft pink. Mature flowers at top and right wing. An excellent flower in all aspects; tall, thick, 20 inch stems, big fat buds, opens well when picked tight. I think I have posted G Pink for a few seasons; it is an amazing flower.

Timing is very interesting; In Sunny Otaki I have been marketing G Pink for two weeks; Graham has his first flower just opening. Bragging rights to Otaki for the Pinks -- but first doubles --- see next email.

Cheers John.
