**Date :** December 20, 2014

At November 7, 2014 I published a picture in Daffnet which I thought to be *N. x xanthochlorus*. Gerd Knoche told me that it may be *N. x perezlarae* (*N. miniatus* x *N. cavanillesii*). He lets me doubt whether I am right or not. The broader petals, no green in the corona, and that the pollen seems to be of no good quality strengthen his opinion.
