Can You Help?

There are quite a few “Possible Intermediates” which are missing measurements, either because it wasn’t recorded on the Application to Register, or the cultivar was registered when measurements weren’t routinely recorded. If you grow any of these cultivars, would you please measure the diameter of the flower and send the results to me at [mgripshover@cinci.rr.com](mailto:mgripshover@cinci.rr.com). We’ll use the average measurement to determine if a cultivar belongs on the Intermediates List. This will help any confusion the judges may have. Thank you.
