Friends, my records show that I bought this cultivar in 1992 at the Ameriflora expo in Columbus, as 'Tamar Fire'. It should be a double, but as you can see, it's not. It's a lovely intermediate-sized cultivar, about 72mm diameter, and deserves a name. It's not a good grower, as I only got about 6 blooms this year. It's obviously old, and likely from Holland. Any suggestions for a name?
