Date : February 24, 2018

I went to the garden today and found a lot blooming. However, I found myself interested more in two of my hybrids than all the already named daffodils.

The first one is a little cross between Glenbrook Minicycla and N. cyclamineus:

The second cross was Goldhanger x Goldfinger. It's hard to see in the picture but I have designated the color code to be 2Y-YOO;

[Very smooth. Good show quality. just a little early here in Zone 8A](#)
