Date : March 5, 2018

At the 2017 ADS Fall Board Meeting, the Board approved a new collection named the "Robert Spotts Ribbon." Criteria for this collection is five different daffodils where green is the predominate color in either the perianth and/or the corona. Two new classes were added to support this award, a class for five green standards and a class for five green miniatures. The best collection from these two classes, receives the Robert Spotts Ribbon, which is coincidentally a green colored ribbon. It just so happens that the ribbon's namesake was the first to receive this special award.

Congratulations Bob!

Nancy
